EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Dierker on 1/7/06.

The application has been amended as follows:

At the end of the claim 25, --wherein prior to contacting the liquid fuel with the dehydrated adsorbent, the process comprises pretreating an adsorbent to form the dehydrated adsorbent, the pretreatment process comprising the steps of:

calcining the adsorbent between about 350°C and about 450°C in an inert dry atmosphere; and then

cooling the adsorbent-- has been inserted.

Claims 26, 30 and 35 have been canceled.

The following is an examiner's statement of reasons for allowance: the prior art of record does not disclose or render obvious a process as called for in claims 1 and 25 for removing thiophene and thiophene compounds from liquid fuel by using an adsorbent which has been dehydrated by calcining the adsorbent at a temperature between about 350 to about 450°C, then cooled. The closest art Michlmayr (4,188,285) discloses a process of removing thiophene by using an adsorbent. However, Michlmayr is silent as to using such an adsorbent and how the thiophene is bonded with adsorbent.
